📄 Executive Summary

We performed a comprehensive security analysis of **vboxxcloud.nl** across 20 categories. The website received an overall score of **91/100** (grade **A**), with 0 critical issues, 12 warnings, and 87 passed checks.

Overall assessment: vboxxcloud.nl demonstrates a strong security posture. The website follows most security best practices and is well-configured. Minor improvements are possible but no urgent issues were found.

✓ SSL & HTTPS

✓ TLS / Cipher

✓ OWASP Top 10

✓ Robots & Sitemap

✓ Content & CMS

⚠ DNS & Email Security

Prioritized Action Plan

Address these items in order of priority to maximize your security improvement.

#	ISSUE	CATEGORY	URGENCY	RECOMMENDED ACTION
1	CAA record configured	DNS & Email Security	This Week	Add a CAA DNS record, e.g.: 0 issue "letsencrypt.org" to restrict SSL issuance.
2	MTA-STX (email transport security)	DNS & Email Security	This Week	Implement MTA-STX: add a TXT record at _mta-stx.vboxxcloud.nl with value "v=STXv1; id=YYYYMMDD01" and publish a policy file at https://mta-stx.vboxxcloud.nl/.well-known/mta-stx.txt
3	TLS 1.3 supported	TLS / Cipher	This Week	Enable TLS 1.3 on your web server for better security and performance.
4	A04:2021 - Insecure Design	OWASP Top 10	This Week	Add X-Frame-Options or CSP frame-ancestors to prevent clickjacking. Disable GraphQL introspection in production. Implement rate limiting on all endpoints.
5	A05:2021 - Security Misconfiguration	OWASP Top 10	This Week	Remove server version headers. Close unnecessary ports. Remove all exposed configuration files. Disable debug mode in production.
6	A08:2021 - Software and Data Integrity Failures	OWASP Top 10	This Week	Add Subresource Integrity (SRI) hashes to all external scripts and stylesheets. Set COOP and COEP headers for cross-origin isolation.
7	Crawlers not fully blocked	Robots & Sitemap	This Week	If this is a production site, remove or restrict the broad Disallow: / rule to allow indexing.
8	Subresource Integrity (SRI)	Content & CMS	This Week	Add integrity= and crossorigin= attributes to external <script> and <link> tags. Generate hashes at https://www.srihash.org/
9	Cross-Origin-Opener-Policy	Security Headers	This Week	Add Cross-Origin-Opener-Policy: same-origin to isolate your browsing context and protect against cross-origin attacks and Spectre-like vulnerabilities.
10	Cross-Origin-Embedder-Policy	Security Headers	This Week	Add Cross-Origin-Embedder-Policy: require-corp to enable advanced browser isolation features (required for SharedArrayBuffer and high-resolution timers).

Risk Impact Matrix

Overview of findings per category, showing the distribution of critical issues, warnings, and passed checks.

CATEGORY	CRITICAL	WARNINGS	PASSED	SCORE
DNS & Email Security	—	2	3	75
Security Headers	—	2	7	82
TLS / Cipher	—	1	4	84
Robots & Sitemap	—	1	4	80
Content & CMS	—	1	5	88
Performance & SEO	—	1	4	100
Accessibility	—	1	6	85
SSL & HTTPS	—	—	6	100
Branding & Social	—	—	8	100
API Security	—	—	3	100

HTTP Methods	—	—	3	100
Exposed Files	—	—	10	100
Email Security	—	—	4	88
Directory Discovery	—	—	1	100
Error Disclosure	—	—	3	100
Input Reflection	—	—	3	100
Session Security	—	—	1	100
Cookie Compliance	—	—	4	88
Subdomain Takeover	—	—	1	100

The OWASP Top 10 is the globally recognized standard for web application security risks.

✓ A01:2021 - Broken Access Control

LOW RISK

No broken access control issues detected. Access restrictions appear properly configured.

✓ A02:2021 - Cryptographic Failures

LOW RISK

Cryptographic configuration is strong. SSL/TLS and HSTS are properly configured.

✓ A03:2021 - Injection

LOW RISK

Injection protections look adequate. CSP and content type headers are in place.

⚠ A04:2021 - Insecure Design

MEDIUM RISK

Issues found: No visible rate limiting headers detected (may still be present server-side).

🔗 [Add X-Frame-Options or CSP frame-ancestors to prevent clickjacking.](#) [Disable GraphQL introspection in production.](#) [Implement rate limiting on all endpoints.](#)

⚠ A05:2021 - Security Misconfiguration

MEDIUM RISK

Issues found: Dangerous ports are open and accessible from the internet.

🔗 [Remove server version headers.](#) [Close unnecessary ports.](#) [Remove all exposed configuration files.](#) [Disable debug mode in production.](#)

✓ A06:2021 - Vulnerable and Outdated Components

LOW RISK

No known vulnerable components detected in the visible technology stack.

✓ A07:2021 - Identification and Authentication Failures

LOW RISK

Authentication-related configurations appear secure. No user enumeration or credential exposure detected.

⚠ A08:2021 - Software and Data Integrity Failures

MEDIUM RISK

Issues found: Cross-Origin-Opener-Policy (COOP) header not set; Cross-Origin-Embedder-Policy (COEP) header not set.

🔗 [Add Subresource Integrity \(SRI\) hashes to all external scripts and stylesheets.](#) [Set COOP and COEP headers for cross-origin isolation.](#)

✓ A09:2021 - Security Logging and Monitoring Failures

LOW RISK

Security monitoring indicators are in place. A security.txt file is present for vulnerability reporting.

✓ A10:2021 - Server-Side Request Forgery (SSRF)

LOW RISK

No SSRF indicators detected. No open redirects or exposed internal endpoints found.

⚠ Warnings (12)

These items are not immediately critical but should be reviewed to strengthen your security posture.

CAA record configured DNS & Email Security

No CAA record found. Any Certificate Authority can issue SSL certs for your domain.

🔗 [Add a CAA DNS record, e.g.: 0 issue "letsencrypt.org" to restrict SSL issuance.](#)

MTA-STS (email transport security) DNS & Email Security

No MTA-STS record found at `_mta-sts.vboxxcloud.nl`. Without it, email delivery to your domain could silently fall back to unencrypted connections.

🔗 [Implement MTA-STS: add a TXT record at `_mta-sts.vboxxcloud.nl` with value `"v=STSV1; id=YYYYMMDD01"` and publish a policy file at `https://mta-sts.vboxxcloud.nl/well-known/mta-sts.txt`](#)

TLS 1.3 supported TLS / Cipher

TLS 1.3 is not supported.

🔗 [Enable TLS 1.3 on your web server for better security and performance.](#)

A04:2021 - Insecure Design OWASP Top 10

Issues found: No visible rate limiting headers detected (may still be present server-side).

Add X-Frame-Options or CSP frame-ancestors to prevent clickjacking. Disable GraphQL introspection in production. Implement rate limiting on all endpoints.

A05:2021 - Security Misconfiguration OWASP Top 10

Issues found: Dangerous ports are open and accessible from the internet.

Remove server version headers. Close unnecessary ports. Remove all exposed configuration files. Disable debug mode in production.

A08:2021 - Software and Data Integrity Failures OWASP Top 10

Issues found: Cross-Origin-Opener-Policy (COOP) header not set; Cross-Origin-Embedder-Policy (COEP) header not set.

Add Subresource Integrity (SRI) hashes to all external scripts and stylesheets. Set COOP and COEP headers for cross-origin isolation.

Crawlers not fully blocked Robots & Sitemap

robots.txt appears to block all crawlers (Disallow: /). This will prevent search engine indexing.

If this is a production site, remove or restrict the broad Disallow: / rule to allow indexing.

Subresource Integrity (SRI) Content & CMS

1 of 1 external script(s)/stylesheet(s) load without an integrity= hash. If the CDN is compromised, malicious code could be silently injected into your pages.

Add integrity= and crossorigin= attributes to external <script> and <link> tags. Generate hashes at <https://www.srihash.org/>

Cross-Origin-Opener-Policy Security Headers

No Cross-Origin-Opener-Policy (COOP) header found.

Add Cross-Origin-Opener-Policy: same-origin to isolate your browsing context and protect against cross-origin attacks and Spectre-like vulnerabilities.

Cross-Origin-Embedder-Policy Security Headers

No Cross-Origin-Embedder-Policy (COEP) header found.

Add Cross-Origin-Embedder-Policy: require-corp to enable advanced browser isolation features (required for SharedArrayBuffer and high-resolution timers).

security.txt present Performance & SEO

No security.txt file found at /.well-known/security.txt or /security.txt.

Create a security.txt file (RFC 9116) at /.well-known/security.txt to provide security researchers with a responsible disclosure contact.

Form labels Accessibility

2 of 2 form inputs may be missing accessible labels.

Associate each <input> with a <label for="..."> or use aria-label/aria-labelledby.

Passed Checks (87)

These checks were all successfully validated.

<input checked="" type="checkbox"/> SPF record configured DNS & Email Security	<input checked="" type="checkbox"/> Fast server response time (TTFB) Performance & SEO
<input checked="" type="checkbox"/> DMARC record configured DNS & Email Security	<input checked="" type="checkbox"/> Response compression enabled Performance & SEO

Detected Technologies

The following technologies were detected on vboxxcloud.nl.

WEB SERVER

Apache

⚠️ **HTTP/2 not enabled** — The server is using HTTP/1.1. Enabling HTTP/2 can noticeably improve page load speed.

Category Details

DNS & Email Security

75/100

CAA record configured

No CAA record found. Any Certificate Authority can issue SSL certs for your domain.

🔧 Add a CAA DNS record, e.g.: 0 issue "letsencrypt.org" to restrict SSL issuance.

MTA-STS (email transport security)

No MTA-STS record found at `_mta-sts.vboxxcloud.nl`. Without it, email delivery to your domain could silently fall back to unencrypted connections.

🔧 Implement MTA-STS: add a TXT record at `_mta-sts.vboxxcloud.nl` with value `"v=STSV1; id=YYYYMMDD01"` and publish a policy file at `https://mta-sts.vboxxcloud.nl/.well-known/mta-sts.txt`

Robots & Sitemap

80/100

Crawlers not fully blocked

`robots.txt` appears to block all crawlers (`Disallow: /`). This will prevent search engine indexing.

🔧 If this is a production site, remove or restrict the broad `Disallow: /` rule to allow indexing.

Security Headers

82/100

Cross-Origin-Opener-Policy

No Cross-Origin-Opener-Policy (COOP) header found.

🔧 Add Cross-Origin-Opener-Policy: `same-origin` to isolate your browsing context and protect against cross-origin attacks and Spectre-like vulnerabilities.

Cross-Origin-Embedder-Policy

No Cross-Origin-Embedder-Policy (COEP) header found.

🔧 Add Cross-Origin-Embedder-Policy: `require-corp` to enable advanced browser isolation features (required for `SharedArrayBuffer` and high-resolution timers).

TLS / Cipher

84/100

TLS 1.3 supported

TLS 1.3 is not supported.

🔧 Enable TLS 1.3 on your web server for better security and performance.

Accessibility

85/100

Form labels

2 of 2 form inputs may be missing accessible labels.

🔧 Associate each `<input>` with a `<label for="...">` or use `aria-label/aria-labelledby`.

Content & CMS

88/100

Subresource Integrity (SRI)

1 of 1 external script(s)/stylesheet(s) load without an integrity= hash. If the CDN is compromised, malicious code could be silently injected into your pages.

[Add integrity= and crossorigin= attributes to external <script> and <link> tags. Generate hashes at <https://www.srihash.org/>](#)

Email Security

Subdomain Takeover **100/100**

✓ All checks passed

Next Steps & Recommendations

Recommended Next Steps

- 1 Address Critical Issues First** — No critical issues were found. Focus on resolving the warnings to further improve your score.
- 2 Review Warnings** — After resolving critical issues, address the 12 warnings to strengthen your overall security posture.
- 3 Re-scan Your Website** — After implementing fixes, run a new scan to verify improvements and ensure no new issues were introduced.
- 4 Schedule Regular Scans** — Security is not a one-time effort. We recommend scanning your website at least once per month to catch new vulnerabilities.

Report Validity

Scan performed: **09 Apr 2026, 07:57 UTC**

Report generated: **09 Apr 2026, 13:29 UTC**

Valid until: **09 May 2026**

Scan type: **Deep Scan**

This report reflects the state of the website at the time of scanning. Security configurations may change over time. We recommend re-scanning after 30 days or after significant changes to your website.

YOUR SECURITY SCORE

91/100

Grade A

Excellent! Your website meets high security standards.
